## Declaration

I declare that this material, which I now submit for assessment, is entirely my own work and has not been taken from the work of others, save and to the extent that such work has been cited and acknowledged within the text of my work. I understand that plagiarism, collusion, and copying are grave and serious offences in the university and accept the penalties that would be imposed should I engage in plagiarism, collusion or copying. I have read and understood the Assignment Regulations set out in the module documentation. I have identified and included the source of all facts, ideas, opinions, and viewpoints of others in the assignment references. Direct quotations from books, journal articles, internet sources, module text, or any other source whatsoever are acknowledged and the source cited are identified in the assignment references. This assignment, or any part of it, has not been previously submitted by me or any other person for assessment on this or any other course of study.

I have read and understood the DCU Academic Integrity and Plagiarism at [https://www4.dcu.ie/sites/default/files/policy/1%20-%20integrity\\_and\\_plagiarism\\_ovpaa\\_v3.pdf](https://www4.dcu.ie/sites/default/files/policy/1%20-%20integrity_and_plagiarism_ovpaa_v3.pdf) and IEEE referencing guidelines found at <https://loop.dcu.ie/mod/url/view.php?id=448779>.

## Listings

## **1 Introduction**

There are an estimated 31 billion devices currently in use. As these devices are being adopted in all aspects of life - from home devices, medical devices, industrial devices - there are valid concerns raised about the security capabilities of these devices.

## **2 IoT Device Resources**

Internet of Things devices are typically low-power devices and sensors. These devices are network connected, and often interact with a users personal information. As an affect of the low power resources used on these devices, the devices critical functions take precedence in terms of memory or processing performance. This leaves little availability in terms of available resources for aspects such as security.

## **3 Conclusion**

## **A Appendix**
